DOORSET Technologies

Environmental Policy Statement

At Doorset Technologies Ltd, we recognise our responsibility to protect the environment, ensure the sustainability of natural resources, and reduce our environmental impact. We are committed to integrating sound environmental practices into all aspects of our operations and aligning our processes with the principles of the ISO 14001 Environmental Management System.

Our Commitments:

1. Compliance with Environmental Legislation

We will comply with all applicable environmental laws, regulations, and other relevant requirements, ensuring that our activities meet or exceed industry standards.

2. Pollution Prevention and Environmental Protection

We aim to prevent pollution by minimising emissions, waste, and discharges, and by conserving resources such as energy and water. We will take all necessary steps to reduce our ecological footprint and protect ecosystems and biodiversity.

3. Continuous Improvement

We are committed to the continual improvement of our Environmental Management System (EMS). This includes regularly setting, reviewing, and updating environmental objectives and targets. By doing so, we will enhance our environmental performance and reduce the environmental impacts of our activities, products, and services.

4. Sustainable Resource Use

We will promote sustainable resource use throughout our organisation. This includes maximising energy efficiency, reducing waste generation, encouraging the recycling and reuse of materials, and adopting renewable energy solutions where feasible.

5. Training and Awareness

We will provide our employees with regular training and awareness programmes to promote an environmentally responsible culture. This will empower our workforce to actively contribute to the company's environmental goals and objectives.

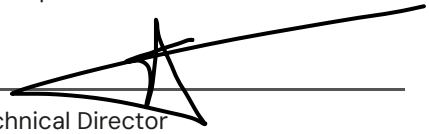

6. Engagement with Stakeholders

We are committed to engaging with our stakeholders, including customers, suppliers, employees, and the community, to foster a collaborative approach toward achieving environmental sustainability. We will communicate our environmental performance openly and transparently.

7. Emergency Preparedness

We will ensure that we have systems in place to respond effectively to environmental emergencies, including the prevention and mitigation of any potential environmental impacts arising from our operations.

By embedding these commitments into our everyday business practices, we aim to reduce our environmental footprint and contribute to the overall wellbeing of the planet. This policy is communicated to all employees and made available to the public, and will be reviewed at least annually to ensure its continued relevance and effectiveness.
